WORKSHOP OUTLINE

Why we need to build **RESILIENCE**

RETHINK
CONSULTING

WHY RESILIENCE - While natural disasters and climate change pose threats to communities and organisations, there are many other risks facing our ever complex society. These include, geopolitical events, resource constraints, declining net energy, highly leveraged households and governments, and volatile and interdependent financial systems. All of which make the case for building resilience increasingly compelling.

Embracing vulnerabilities can turn potential risks and challenges into opportunities.

Content packed, this full day workshop comprises five modules. A holistic approach is taken to exploring macro and micro issues and trends which are, and will, increasingly impact communities, business and local and regional government organisations alike.

In examining the primary drivers of change, solutions can be developed which move individuals, organisations and communities towards building resilience.

MODULE 1 - RESILIENT THINKING
